Built for containers. Connected through logistics.

Modern Containers Kenya Limited is a Nairobi-based company providing integrated container and logistics solutions across Kenya and through an international network of agents. Our focus is practical: source the right container, coordinate the right movement, and support the customer from enquiry through delivery.

CORE BUSINESS

01 **Container Trading**

02 **Freight Forwarding**

03 **Customs Agency**

04 **Transport**

05 **Warehousing**

SPECIALIZED SOLUTIONS

Container Fabrication

Custom conversion of containers into offices, shops, homes, hospitality spaces and other practical structures.

Heavy Lifting

Handling support for suitable container, machinery and project cargo requirements of up to 50 tons.

Agricultural Machinery

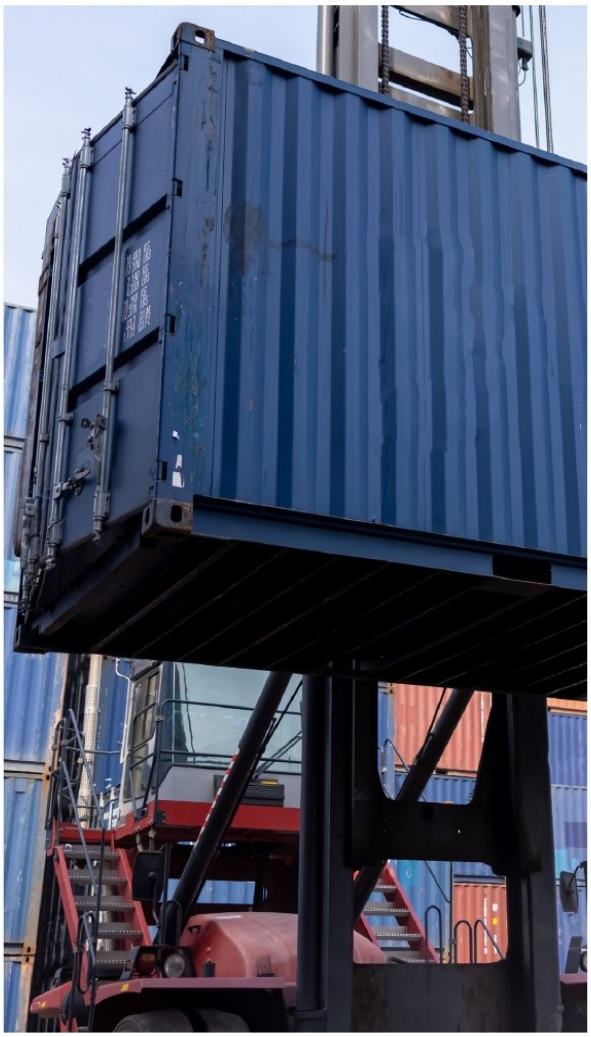

Second-hand tractors and agricultural machinery supported through the company's YCC relationship.

Out-of-Gauge Cargo

Specialized logistics coordination for loads requiring additional planning because of size, weight or handling needs.

Container Trading

Quality shipping containers for storage, transport and conversion.

We supply brand-new single-trip and quality second-hand containers in multiple sizes and specifications. Our team helps customers select the right unit based on intended use, condition, delivery location and budget.

CONTAINER RANGE

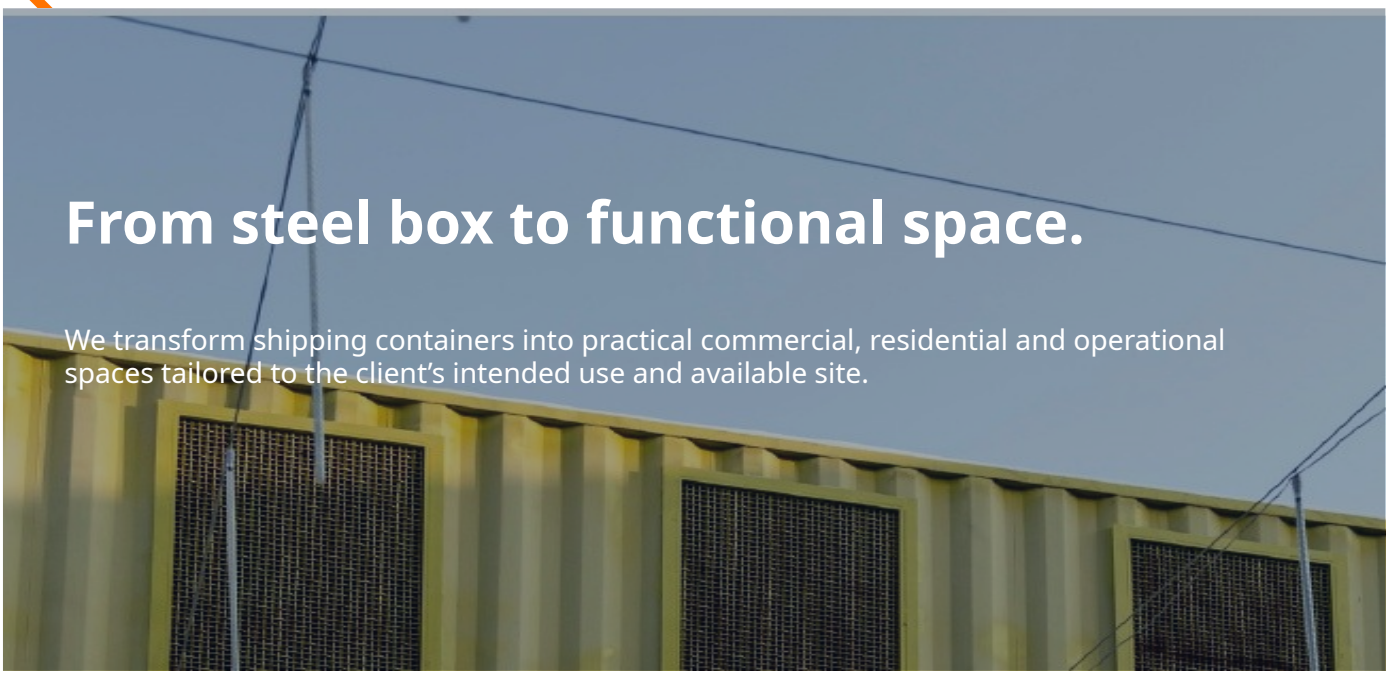

- 10ft GP
- 20ft GP
- 40ft GP
- 40ft High Cube
- 40ft Low Cube
- 20ft Reefer
- 40ft Reefer
- ISO Tanks

WHY IT WORKS

One source. Multiple options. Delivery support.

Containers can be supplied for shipping, secure storage, commercial applications or fabrication. We also coordinate nationwide delivery, allowing customers to combine sourcing and logistics through one provider.

Container Fabrication

From steel box to functional space.

We transform shipping containers into practical commercial, residential and operational spaces tailored to the client's intended use and available site.

APPLICATIONS

Offices

Professional workspaces for businesses, projects and institutions.

Shops

Secure retail spaces for commercial and roadside locations.

Living Houses

Customized residential spaces designed around practical use.

Farm Houses

Functional structures for accommodation and farm operations.

Bars & Restaurants

Distinctive hospitality spaces built around a container shell.

Washrooms

Ablution and sanitary units for sites, farms and institutions.

Transport & Warehousing

TRANSPORT

Move containers, machinery and cargo across Kenya.

We coordinate nationwide transportation for shipping containers, general cargo, machinery and out-of-gauge loads, with planning based on size, destination, site access and handling requirements.

Typical movements

- Container delivery
- Machinery transport
- General cargo
- Out-of-gauge cargo

WAREHOUSING

Flexible storage that supports the wider logistics chain.

Warehousing can bridge the gap between arrival, customs processing, onward transport and final distribution. We coordinate storage requirements around cargo type, expected holding period and the next stage of movement.

Integrated flow

- Freight
- Customs
- Warehousing
- Transport
- Delivery

FREIGHT FORWARDING &

International coordination with local support.

Through our network of international agents and logistics partners, we coordinate cargo movement from overseas origins through freight, customs-related processes and onward local logistics. The aim is a more connected journey with fewer hand-offs for the customer.

01	**Cargo details**	Origin, destination and shipment requirements
02	**Freight movement**	Coordinate international cargo movement
03	**Customs**	Support documentation and clearance coordination
04	**Local logistics**	Warehousing or transport where required
05	**Final delivery**	Move cargo to the agreed destination

One coordinated logistics chain - from origin to destination.

Heavy Lifting & Agricultural Machinery

UP TO

50 TONS

Heavy lifting capability for suitable container, machinery, industrial and construction handling requirements.

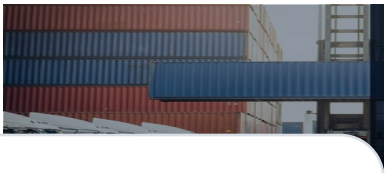

AGRICULTURAL MACHINERY

Supporting mechanized agriculture with reliable second-hand equipment.

Modern Containers Kenya Limited is the Kenyan appointed agent for YCC, a Chinese trader in second-hand tractors and agricultural machinery. This capability complements our transport and logistics services for machinery movements.

SPECIALIZED LOGISTICS

Machinery Handling

Coordinate lifting, transport and positioning requirements for suitable machinery and equipment.

Out-of-Gauge Cargo

Plan transport for loads that fall outside conventional dimensions or handling conditions.

Container Handling

Support loading, offloading and positioning of shipping containers for customer sites and projects.

Project & Capability Highlights

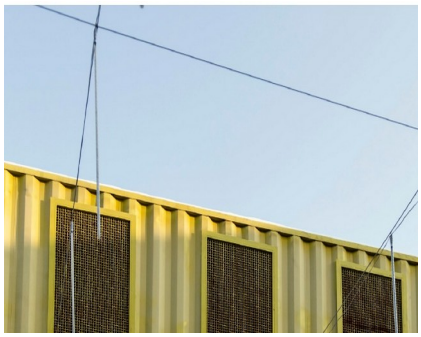

The following highlights show the types of projects and scopes Modern Containers Kenya Limited is equipped to deliver. Client-specific names and locations can be added as projects are cleared for publication.

CONTAINER TRADING

Container Supply & Delivery

Typical scope: container selection, condition confirmation, quotation, transport planning and final delivery to the customer site.

FABRICATION

Custom Container Conversion

Typical scope: container sourcing, layout planning, structural modification, doors and windows, finishing, transport and site placement.

FREIGHT & LOGISTICS

Integrated Cargo Movement

Typical scope: origin coordination, freight forwarding, customs support, warehousing where required, onward transport and final delivery.

Why Modern Containers Kenya

Wide Container Range

New and second-hand options across multiple sizes and container types.

Integrated Logistics

Freight, customs, transport and warehousing coordinated around one cargo journey.

Nationwide Delivery

Container and cargo transportation arranged to destinations across Kenya.

Heavy Lifting

Capability to support suitable lifting requirements of up to 50 tons.

Global Agent Network

International freight coordination supported through a network of logistics agents.

Custom Fabrication

Containers converted into practical spaces tailored to the intended use.

HOW WE WORK

A simple path from enquiry to delivery.

1

Share requirements

2

Tailor the solution

3

Coordinate the operation

4

Deliver & complete

One partner across containers, freight, customs, transport and warehousing.
